## Special authority for a further German appointment – unexecuted proposal

### 1 Status and proposed principal

This text was prepared by the company administration on 6 November 2026 for review. It is not executed. The proposed principal is Al Safa Horizon Technologies LLC, Dubai mainland, Trade Licence 985274. The authority of the person or persons who may sign the final instrument for the LLC must first be established. Listing a name in a proposed signature block does not establish that person's office or powers.

### 2 Proposed representative and limits

The company proposes to appoint Nora Albers, resident at Lychener Straße 18, 10437 Berlin, as representative for a further German notarial appointment concerning the acquisition of the shares numbered 1 to 25 and 61 to 75 in Havelquarz Intelligenz & Grund GmbH. The aggregate price of the existing agreement is EUR 960,000. The proposed authority would be confined to the final wording specifically approved for the appointment and would not authorise any additional capital contribution or guarantee.

### 3 Acts not included

The proposal does not authorise a purchase of German real property, a borrowing by the German company, an appointment as manager of that company, substitution or self-dealing. It does not authorise a change to the purchase price or a second payment. Any need for a differently defined power must be settled in a revised text before execution.

### 4 Existing agreement and temporal question

The proposal does not contain a ratification of the agreement signed by Yusuf Rashid on 14 October 2026. Whether a separate confirmation is intended, which organ may issue it under the law governing the LLC and whether a further declaration by Maryam Al Noor is relevant are questions submitted to counsel. The fact that an updated licence was made available later is not restated here as an earlier event.

### 5 Execution and supporting records

The final instrument is to be accompanied by the supporting company records required for its signatories. The contemplated form of execution, certification and delivery to Germany has not been approved. No original signature, electronic signature verification, notarisation, MOFA attestation or German consular legalisation belongs to this draft. It is retained as the administration's proposed wording only.
